

What to flush

and what items should be placed in the trash.

Whether you are on a septic system, or the municipal sewer, it's important to maintain a healthy, flowing system that is able to operate efficiently. **Damage to either system is costly and may cause harm to the environment.**

Keep our lines free of debris

The label might say "Flushable," but disposable wipes, makeup cloths and cleaning wipes have become one of the greatest problems in our sewer lines. These items don't break down, and combine with fat, oil and grease to create clogs in our system that can lead to raw sewage overflows into homes, businesses and waterways. Scan the QR code to watch our video and learn more.

**Toilets
are not
trash
cans**

Only flush the 3 P's

Paper

(toilet paper only)
