Strategic Pillar							
Infrastructure & Facilities Integrity							
Project Description							
Construction of a municipal development services center in the Wellen Park.							
Project Rationale							
This project will assist in providing municipal development services for the residents of the Wellen Park. This project will serve as a satellite office for services provided by NDS to ensure efficient and effective government services are available to all residents. While City Hall is a central location to most residents of the City, the exception is Wellen Park, which is heavily populated and growing rapidly. Adding a satellite location in Wellen Park will help provide those residents, contractors and developers with easier access to NDS and the services it provides.							
Funding Strategy							
This project is not currently funded. \$500,000 has been added to the project for FY27, utilizing Building Funds.							
Expenditures To Date \$0							
Operation Budget Impact							
Operating impact will be determined at a later date. Hiring additional staff for this location is not anticipated at this time.

Strategic Pillar							
Infrastructure & Facilities Integrity							
Project Description							
The Building Division is planning renovations to repurpose and modernize the existing Police Headquarters facility to create a functional, efficient, and secure office space that meets the operational needs of the Development Services Department. The scope of the renovation includes interior upgrades such as structural improvements, such as updated security features, reconfigured office layouts, ADA compliance upgrades, and aesthetic improvements to support a productive and professional working environment.							
Project Rationale							
The renovation of the Police Headquarters is a necessary and strategic investment to ensure that the Development Services Department operations are supported by a safe, functional, and modernized workspace. The current facility, while structurally sound, no longer meets the evolving needs of the department in terms of space efficiency, technological capacity, and workplace safety standards.							
Key drivers for this renovation include:							
- Space Optimization: The existing layout is not conducive to current staffing levels, workflows, or modern policing practices. Renovations will allow for more efficient use of space and improved departmental collaboration. - Health and Safety: Upgrades are required to address code compliance, improve air quality, and enhance building security for both personnel and the public. - ADA and Accessibility: The facility requires modifications to meet current ADA standards, ensuring accessibility for all employees and visitors. - Long-Term Cost Savings: Proactive renovation reduces the likelihood of costly emergency repairs in the future and extends the useful life of the building. - Efficient Use of Funds: Utilizing designated building funds allows the City to maximize its investment in municipal infrastructure without impacting general fund operational budgets.							
This renovation aligns with the City's commitment to maintaining high-quality public facilities, supporting essential services, and ensuring the responsible use of public resources.							
Funding Strategy							
Funding strategy will be utilizing the Building Division Fund							
Operation Budget Impact							
Operating impact will be determined at a later date

Environmental Resiliency & Sustainability					
Project Description					
This rewilding project, proposed by the City's Natural Resources Division, aims to restore and manage upland habitats on City-managed land. The land is located northeast of the Canine Club Dog Park at 6442 Appomattox Dr., North Port, FL 34287. The project's focus is to transform a portion of the currently sodded and maintained land into habitats composed of native plants, including trees and understory vegetation. These habitats would support a variety of wildlife, including Florida listed species such as the Gopher Tortoise (<i>Gopherus polyphemus</i>), which are currently present in the area. This plan represents the first phase of a long-term effort to establish native species on several City-owned parcels, including the ones currently leased to the Jockey Club of North Port.					
Project Rationale					
Overall, the project aims to demonstrate the city's commitment towards habitat restoration, environmental sustainability, and overall citizen well-being.					
Funding Strategy					
This project is funded by the Tree Fund.					
Expenditures to date \$0

Strategic Pillar																
Environmental Resiliency & Sustainability																
Project Description																
The goal of this project is to identify and acquire properties suitable for conservation, including a potential stormwater park located north of I-75 at Sumter. This initiative is part of the broader effort to enhance environmental sustainability, manage stormwater effectively, and provide community benefits through green space development. The successful completion of this project will contribute to sustainable land use, improved stormwater management, and enhanced environmental health. The establishment of a stormwater park will help mitigate flooding, improve water quality, and provide recreational opportunities for the community. The acquisition and conservation of the land will further the City's long-term environmental goals while addressing immediate concerns related to stormwater runoff.																
Project Rationale																
Protecting and conserving valuable land resources ensures the preservation of natural habitats, improves community resilience, and enhances environmental quality. The focus is on properties that can serve specific purposes, such as stormwater management and flood mitigation. By utilizing land to address stormwater management needs, this project aims to create a space that can effectively manage and reduce runoff from urban development, which can reduce flooding risks, improve water quality, and create green spaces for the community. A stormwater park is an innovative way to combine environmental goals with recreational and community benefits. City staff will work with the County to assess the feasibility of different parcels of land and prioritize them based on criteria such as environmental value, location, size, and suitability for stormwater management. In partnership with the County and the City's Grants team, efforts will be made to explore additional funding sources beyond the Tree Fund. The team will investigate potential financial support through programs like the Community Development Block Grant (CDBG) or other relevant funding opportunities that can assist in land acquisition. This collaboration will ensure that the project secures adequate financial resources for the purchase of the identified properties. Using a variety of funding sources allows the project to have a broader financial base, increasing the chances of securing the necessary resources to acquire the property and complete the conservation efforts. This project is a critical step in ensuring that land is preserved for environmental purposes, while also exploring funding mechanisms to make the land acquisition and development of the stormwater park a reality.																
Funding Strategy																
This project is funded by the Tree Fund.																
Operation Budget Impact																
Operating impact will be determined at a later date

Economic Development & Growth Management							
Project Description							
This project provides for engagement of a planning consultant to develop a master plan for Activity Center 6 and Activity Center 10. Pursuant to the Strategic Plan and City Commission direction, this project will create a master plan vision to provide for sustainable growth and investment in these Activity Centers. These areas are critical to achieving an improved balance between residential and commercial/industrial land use in North Port. Development of a master plan in advance of the finalization and construction of the new I-75 interchange is paramount to ensure a proactive planning approach regarding transportation, utilities, public amenities, and economic development. Failure to provide for master planning in this area could result in future development which may be inconsistent with the City's vision, and furthermore, unsustainable and obstructive to balancing the City's tax base.							
Project Rationale

Quality of Life							
Project Description							
The Parks & Recreation Department completed an ADA evaluation of several park/facility locations utilizing the expertise of ACT Services, Inc. Based on the evaluation, recommendations for physical improvements to increase accessibility of the City's parks and facilities have been compiled into a transition plan with projects phased over several years.							
Project Rationale							
The ADA transition plan provides a phased approach to implementing physical improvements, repairs and adjustments that remove barriers preventing access to parks and facilities. Access improvements began in 2020. Improvements are underway for connectivity throughout Dallas White Park in conjunction with the Dallas White Park Multipurpose Field project which was budgeted in FY24. FY25 is scheduled to upgrade all public restrooms in park locations to meet the ADA requirements as outlined in the transition plan. FY26 includes improvements at Dallas White & Butler Park kayak launch and amenities and Oaks Park parking lot, seating area and amenities. Future fiscal years will continue the required ADA improvements throughout the parks and recreation system as documented in the plan. Implementation of the ADA improvements is required under ADA Title II regulations for all public agencies.							
Funding Strategy							
This project is funded using a Surtax allocation as Impact Fees are not applicable. The ADA transition plan is a phased plan and is required. There is currently no funding source for the FY30 resurfacing of the Skate Park as part of this request.							
Expenditures To Date \$117,276							
Operation Budget Impact							
No operating impact is expected.

Quality of Life																
Project Description																
Build and equip a public space to honor Veterans of all U.S. Military forces, past, present and future.																
Project Rationale																
On September 23, 2019 a joint meeting was held with the City Commission and the Historic and Cultural Advisory Board to discuss proposed areas for a new park to honor Veterans. On September 8, 2020, Commission approved the City Center Complex site for the new park location. Parks & Recreation was tasked with establishing an Ad Hoc Committee to develop design options and assist with fundraising opportunities. Design plans, under work assignment with Pennoni Associates, Inc., are complete. Jon F. Swift, Inc. was awarded the construction management services for this project, and received Commission approval in May 2025. Construction will begin July 2025, anticipated completion is Summer of 2026.																
The Veterans Park Advisory Committee, established by Resolution #2021-R-17 in March of 2021, was tasked with providing input and other recommendations to the Parks & Recreation Department related to initiatives to obtain funding, sponsorships, and donations for the Circle of Honor planning, design, and construction. In alignment with the committee's recommendations, the City's Tribute program will serve as the mechanism to collect donations towards brick pavers, flag poles and other monuments associated with the Circle of Honor to help offset costs associated with the project.																
Funding Strategy																
Project is funded through Park Impact Fees.																
Expenditures to date \$304,645																
Operation Budget Impact																
Park Maintenance anticipates increased operating costs of \$12,200 to include mowing, trimming and trash removal.

Strategic Pillar					
Quality of Life					
Project Description					
This project is to develop a new passive park on a 4-acre site along Boca Chica Avenue on the northeast side of North Port.					
Project Rationale					
This area of the City currently lacks park sites to support the needs of residents. The closest existing parks are Blue Ridge Park at four miles and Atwater Park at five miles. Standard industry guidelines show service area radius of 1/2 mile for neighborhood parks and three miles for community parks. Design of this park has been completed taking into account neighborhood input and ensuring a natural and sustainable outdoor education area that respects and protects North Port's flora, fauna and native species. Boca Chica will have a small play area, educational signage and a walking path that meanders around existing gopher tortoise burrows, with a story stroll to encourage physical fitness and literacy in our community. This will begin to fill a gap East of Salford and West of Atwater. Halfacre Construction provided a GMP proposal for construction services, and upon funding allocations, will be prepared for Commission award in early FY26.					
Funding Strategy					
This project is funded by Park Impact Fees.					
Expenditures to date \$74,432					
Operation Budget Impact					
Park Maintenance anticipates increased operating costs of \$9,200 / year to include trash removal, mowing, trimming and trail maintenance.

Strategic Pillar						
Quality of Life						
Project Description						
Transition the softball field at Dallas White Park to a multi-purpose field to support youth sports activities.						
Project Rationale						
There is a need for additional multipurpose fields throughout the park system. Staff is recommending to replace the softball field at Dallas White Park with a regulation size soccer / football field. In addition, ADA elements supporting field access are being addressed through the ADA Transition Plan project (GM20AT). A pre-construction work assignment was awarded to Wharton-Smith, Inc. and an engineering work assignment was issued to DMK Associates, Inc. A GMP is in development for construction services and additional Park Impact Fee funding is requested for FY26. It is anticipated an agreement will be presented to Commission for approval in early FY26.						
Funding Strategy						
This improvement is funded using an allocation from the Park impact fee fund.						
Expenditures to date: \$46,952						
Operation Budget Impact						
Park Maintenance anticipates increased operating costs of \$11,000 to include fertilizer, pesticide and field paint.

Quality of Life		
Project Description		
This project is for design and construction of a multi-use trail and connecting Warm Mineral Springs Park to the North Port connector of the Legacy Trail.		
Project Rationale		
The addition of this trail connection will provide North Port residents with the opportunity to safely travel from North Port to Venice to downtown Sarasota as part of the Legacy Trail regional trail system. From Warm Mineral Springs Park, there is opportunity to develop trail segments connecting North Port to Charlotte County via US 41, River Road and through the Myakka State Forest. This is supported by the Trust for Public Land and is part of the Florida Gulf Coast Trail connecting Pinellas County to Collier County. During fiscal year 2025, Parks & Recreation in collaboration with the Grants Division of the City Manager's office applied for the SunTrails Grant and the Recreational Trail Grant.		
Funding Strategy		
This project is funded by Parks & Rec Impact Fees, along with a Surtax allocation. The Friends of Legacy Trail have committed \$100,000 to construction and Sarasota County has indicated a contribution of \$250,000 is available for construction.		
Expenditures to date \$10,875		
Operation Budget Impact		
Park Maintenance anticipates increased operating costs of \$28,600/year to include restroom cleaning, trash removal, mowing, trimming and trail maintenance.

Strategic Pillar						
Quality of Life						
Project Description						
Permanent administrative offices, shop space, meeting space, and secure storage for the Park Maintenance teams, vehicles, and equipment. The design will accommodate growth over the next 10-15 years.						
Project Rationale						
Due to the impacts of Hurricane Ian, the Park Maintenance complex was deemed unusable. Dallas White Park has been identified as the new operational site for the Park Maintenance division of Parks & Recreation. This project is for permanent construction of the Park Maintenance Building.						
Funding Strategy						
Funding for construction needs to be identified; design services are being programmed utilizing an allocation from Impact Fees.						
Expenditures to date \$0						

Operation Budget Impact

The operating impacts should be comparable to the Park Maintenance Complex located on Pan American Blvd. and will be determined upon final design of the replacement building.

Strategic Pillar						
Quality of Life						
Project Description						
Through the playground replacement schedule, Hope Park playground is scheduled for replacement in FY2025.						
Project Rationale						
The playground equipment at Hope Park was installed in 2015 and is aging, and will be ready for replacement in fiscal year 2025. Staff performs monthly inspections to assess playground equipment safety and conditions. Surveys will be conducted of the users to determine the amenities to be included in the new playground equipment.						
Funding Strategy						
Surtax funds are being used as an interim financing mechanism to advance costs for the playground project which is funded by federal grant funds and will reimburse the surtax account upon completion.						
Expenditures to date \$0						
Operation Budget Impact						
Replacing the playground equipment with similar equipment, therefore no additional operating impacts are anticipated.

Quality of Life					
Project Description					
This project is to develop a new, approximately 50-acre park along Langlais Drive to serve residents on the east end of North Port. Amenities at this location will be reviewed as part of the Park Master Plan project and are intended to be passive recreation opportunities such as walking trails, primitive camping and canoe/kayaking of the water body on site.					
Project Rationale					
This area of the City currently lacks park sites to support the needs of residents. This parcel has unique features/habitats and has been identified as a future park site.					
Funding Strategy					
Budgetary numbers are a place holder to start funding for this new park location. Upon determination of the amenities to be included; construction estimates will be developed. This project will be funded by a Park Impact Fee allocation.					
Expenditures to date \$0					
Operation Budget Impact					
Operating budget impacts will be determined based upon amenities and final design features.

500,000	500,000	0	0	0	0	0		
Strategic Pillar								
Quality of Life								
Project Description								
A full marcite and tile replacement at the Lazy River is recommended to ensure long-term durability and reduce future maintenance costs.								
Project Rationale								
Since it's opening in 2019, the North Port Aquatic Center has experienced ongoing issues with the marcite in the pools. Several areas have experienced cracking and deterioration. In FY24, the marcite in the Pelican Playground was fully rehabilitated. During this process, it was discovered that the pool's tile had been discontinued since 2019*, requiring a full re-tiling of the Pelican Playground. The Lazy River is now exhibiting significant areas of cracked marcite, raising concerns about long-term structural integrity and safety. If left unaddressed these issues may result in an unplanned closure of the pool, negatively impacting operations and guest experience. To mitigate this risk, a full marcite and tile replacement is recommended to ensure long-term durability and reduce future maintenance costs.								
Funding Strategy								
This project is funded with General Funds.								
Expenditures to date: \$0								
Operation Budget Impact								
There are no operating budget impacts.

250,000	250,000	0	0	0	0	0								
Strategic Pillar														
Quality of Life														
Project Description														
The City of North Port Parks & Recreation Master Plan serves as a roadmap for planning park system improvements and guiding capital investments. Providing accessible, well-maintained, and diverse parks, facilities and programming are essential components that contribute to long-term quality of life in North Port. The master plan document will include a comprehensive analysis of the entire City parks and recreation system and recommendations for the delivery of services to meet the current and future needs of the community while preparing for continued growth. In addition to the system wide master plan, this project will include a site specific master plan for the development of a new park on the Italy Avenue parcel to include essential amenities such as a dog park, community center, sports fields, and trails. The planning process will ensure that these facilities meet the growing demands of the community, providing spaces for outdoor activities, organized sports, and social gatherings.														
Project Rationale														
The Park & Recreation Master Plan is a tool used to ensure the park system serves the needs of the community today and in the future. The existing Parks & Recreation Master Plan was completed in April of 2016, and amended in January of 2018 based on Commission direction. North Port has experienced unprecedented and accelerated growth that far exceeds the projections made at the time. This rapid expansion has dramatically increased the demand for recreational services and facilities, intensifying the need for timely adaptations and a new plan to meet evolving community needs.														
Funding Strategy														
This project is funded by Parks & Recreation Impact Fees. Additional an allocation from the Wellen Park specific Park Impact Fees will be included upon completion of the master plan document.														
Expenditures to date \$118,915														
Operation Budget Impact														
As is the case with other City provided services, expanding the parks and recreation system to meet growth will lead to increased operational costs. The master plan will assess the long-term financial impact of these expansions, identify potential funding sources to mitigate these costs, and recommend strategies for developing and managing resources and facilities in a sustainable manner. Project received Commission approval in April 2025.

Quality of Life

Project Description

Current field lighting is close to end of life, and replacement with LED fixtures is a cost effective strategy to upgrade lighting throughout the Parks system. FY26 plan will update lighting at Dallas White Park. FY27 will update the four little league fields at Atwater Park. FY28 will update the regulation field at Atwater Park. FY29 will update the three soccer fields at Narramore Park. FY30 will update the softball fields at Narramore Park. Additional lighting upgrades will be scheduled for Highland Ridge Park, Larry Thoenisen fields, Butler Park, Highland Ridge Park, McKibben Park, and the Skate Park in future years.

Project Rationale

Implementation of a multiyear plan to upgrade field, court and parking lot to LED lighting. LED field lighting has several benefits such as significant energy efficiency, long lifespan, excellent light quality and uniformity, making them a cost-effective option for large areas like sports fields, outdoor courts and parking areas.

Funding Strategy

This project is part of the 20-year capital improvement plan, however funding is not identified. The implementation plan is estimated to cost \$3,435,000 in total. Funding for FY26 \$160,000; FY27 \$1,165,000; FY28 1,285,000; FY29 \$475,000; and FY30 \$350,000.

Operation Budget Impact

During a recent analysis, Florida Power and Light determined that conversion of one athletic field to LED provides a savings of \$7,000/year.

Quality of Life										
Project Description										
Regrading, revitalization of turf, repair and improvements to fencing and irrigation are necessary are the Canine Club.										
Project Rationale										
The Canine Club opened in September of 2010 and has experienced consistently high usage resulting in substantial wear and tear of the turf and amenities.										
Funding Strategy										
Currently, \$235,000 in funding is needed for these continued repairs at the Canine Club. Staff is recommending \$110,000 in FY27 and an additional allocation of \$125,000 in FY29.										
Operation Budget Impact										
There are no impacts anticipated to the operating budget.

Quality of Life		
Project Description		
Through the playground replacement schedule, the Highland Ridge Park playground is scheduled for replacement in FY2027.		
Project Rationale		
The typical life expectancy of commercial playground equipment ranges from 8-10 years. The playground equipment installed at Highland Ridge Park was installed in 2016 and will be ready for replacement in fiscal year 2027. Staff performs monthly inspections to assess playground equipment safety and conditions and will assess the structure for replacement based on usage, climate, damage and structural condition. Surveys will be conducted of the users to determine the amenities to be included in the new playground equipment.		
Funding Strategy		
This project is funded a Surtax allocation. Park Impact Fees are not applicable.		
Expenditures to date are \$0.		
Operation Budget Impact		
Replacing the playground equipment with similar equipment, therefore, no additional operating impacts are anticipated.

Project Description

The Park system has pavilions in 15 parks. This plan will make necessary repairs or replacements to pavilions based on structural condition. Locations include Canine Club, Dallas White Park, McKibben, Pine, LaBrea, Highland Ridge, Garden of the Five Senses, Hope, Kirk, Myakkahatchee Creek Environmental Park, Butler, Blue Ridge, Marina, and Atwater Parks.

Project Rationale

Implementation of a multi-year pavilion repair and replacement plan to address park infrastructure.

Funding Strategy

Parks & Recreation is requesting annual funding to offset repairs or replacement of the existing pavilions throughout the Parks system. Funding by fiscal year is estimated at \$100,000 in FY27; \$105,000 in FY28; \$110,000 in FY29; and \$115,000 in FY30. Park Impact Fees are not applicable.

Operation Budget Impact

There are no additional operating impacts anticipated. Annual revenue generated through pavilion rentals is approximately \$12,000.

Quality of Life

Project Description

Replacing the signs through the park system will enhance the look at the entrance of each park. Staff is analyzing sign options that will have a greater longevity and be cost effective to periodically update.

Project Rationale

Wood routed signs have a typical life span of 8-10 years. The existing welcome and rules signage was installed over 10 years ago and is showing deterioration and impact from the elements.

Funding Strategy

This project is currently unfunded. Park Impact Fees are not applicable.

Operation Budget Impact

No additional operating impacts anticipated.

Project Description						
The fields at Atwater Park opened in June of 2011 and are highly used by the leagues. Proper maintenance and periodic rehabilitation is crucial to field health and longevity. As part of a multi-year field rehabilitation project, the regulation and little league fields at Atwater Park are rehabilitation eligible starting in FY28.						
Project Rationale						
Despite ongoing maintenance of turf fields, a full renovation is needed on a periodic basis to ensure the health, playability and safety of the field. Staff anticipates a full renovation will be needed between 15-18 years of regular use.						
Funding Strategy						
Funding is not identified for these services. Park impact fees are not applicable.						
Operation Budget Impact						
No operating impacts are anticipated.

Project Description The original playground safety surface was installed in 2018, and rehabilitated in 2024. The Boundless Playground is one of the highest visited playgrounds in the park system. It is necessary to replace the 1.5" of surfacing due to wear and tear every four years.	
Project Rationale The Park Maintenance division of Parks & Recreation Department is requesting funding to repair the entire playground surface at the Garden of the Five Senses. This is a special use playground and requires specialized care. Park Maintenance staff have been trained on proper maintenance of the surface, however full resurfacing is required at regular intervals.	
Funding Strategy In fiscal year 2028, \$250,000 will be needed to resurface the playground surface. A funding source is not currently identified. This project does not meet the requirements to use Park Impact Fees.	
Operation Budget Impact Upon resurfacing, maintenance is required every 24 months and is included in the applicable operating budget for the specified year. A full top resurface is recommended every 48 months.

Quality of Life

Project Description

The Park Maintenance Division of the Parks & Recreation Department took over the maintenance and care of the softball fields at Narramore Park in 2021. This is a phased approach rehabilitating one playing field per year over three fiscal years. This project establishes a multiyear renovation plan to address field leveling, turf revitalization, clay addition, laser grading, irrigation improvements and improvements to related amenities.

Project Rationale

In order to maintain a safe playing surface, field renovations and rehabilitation is necessary.

Funding Strategy

Funding is not identified for these repairs. Park Impact Fees are not applicable. The first field should be rehabilitated in FY28, \$120,000; field 2 in FY29 \$125,000, and field 3 in FY30 \$130,000.

Operation Budget Impact

No additional impacts to the operating budget are anticipated.

Quality of Life

Project Description

The sound system at the Aquatic Center is utilized for emergency announcements that include weather, pool clearing, and lost children. In 2030 this system will have been exposed to sun, weather, and heavy utilization for over a decade and for safety and continuity of operations will require replacement. This system is already showing major signs of deteriorations due to the exposure to harmful damaging UV rays.

Project Rationale

The North Port Aquatic Center's Sound System will be 11 years old in 2030 and is recommended for replacement. This system is exposed to harmful and damaging UV rays.

Funding Strategy

No funding is currently identified for this project, although \$75,000 will be needed in FY30.

Operation Budget Impact

No additional impact to operating is expected.

Project Description					
This project is part of the overall master plan for Warm Mineral Springs Park. The initial phase of the master plan addresses building restorations, and improvements to the parking lot and utility infrastructure. At the February 25, 2025 Commission meeting, staff received commission support to perform a historic renovation of the main building, a hybrid renovation to the spa building, and stabilization and mothballing of the Cyclorama, all with wet floodproofing measures.					
Project Rationale					
The adopted Warm Mineral Springs Park Master Plan recommends restoration of the historic buildings. Hurricane Ian impacts led to the condemnation of all three existing buildings. Daily operations are currently being supported by temporary buildings at a cost of approximately \$150,000 per year.					
Funding Strategy					
Funding sources for this project are Park & Rec Impact Fees, Warm Mineral Springs, and Surtax.					
Expenditures to date \$1,659,445					
Operation Budget Impact					
No additional impact on operating budget is anticipated as a result of the building restoration and improvements.

Economic Development & Growth Management

Project Description

This project is for future improvements occurring within the 60-acre undeveloped parcel. It is recommended that the first phase of the development on the 60 acres supports a trail and trailhead connection to the North Port Connector of the Legacy Trail which is being done through project P24LTC.

Project Rationale

At the April 9, 2019 Commission meeting, Commission adopted the Warm Mineral Springs Park Master Plan. This project supports the future development on the 60 acres. Project P24LTC is bringing forward Legacy Trail connections through the 60 acres and connecting to Warm Mineral Springs. Additionally, staff is preparing conservation easements in support of preserving the majority of the parkland.

Funding Strategy

Funding source needs to be identified. The funding previously referenced is being reallocated to project WM19BR for the building renovations at Warm Mineral Springs Park.

Expenditures To Date \$0

Operation Budget Impact

Operating impacts will be determined upon completion of professional design.

Strategic Pillar					
Safe Community					
Project Description					
Design and replace Fire Station 81 and Headquarters.					
Project Rationale					
Fire Station 81 Renovation Project (F17R81) was developed in fiscal year 2017 to renovate and overhaul an aging fire station that was opened in 1998. The original plan for this project was to update and modernize the fire station and administrative offices to address current and future needs.					
Due to Hurricane Ian, the damage sustained to Fire Station 81 added to the list of items that were planned for renovation and upgrading requiring the building to be brought up to current building codes as we now exceeded the 50% rule. Wharton-Smith provided staff with two options, retrofit the station using the existing shell or demolish the structure and rebuild. The less expensive option is to demolish and rebuild.					
Fire Rescue coordinated with Finance and developed a plan to support the change in the project from a renovation to a rebuild causing a budget amendment to properly support the project and complete Fire Station 81 as it is listed as critical infrastructure.					
Funding Strategy					
This project is funded with General Fund, Fire Rescue District, General Fund Renewal and Replacement, District Renewal and Replacement and Surtax funds.					
Expenditures to Date \$1,099,554					
Operation Budget Impact					
Some operating impacts are expected as this is an expansion of an existing facility.

Project Description		
This project is for the future land acquisition, design, and construction of a new fire station (Fire Station A) tentatively in the area north of I-75 at N. Toledo Blade Blvd as well as associated response apparatus. The Engine and Ambulance were ordered via a letter of intent to purchase and are anticipated to be delivered in 2026. The timeline of this project could continue to change based upon development timelines.		
Project Rationale		
Land may need to be purchased in advance of station design and construction. There is potential that FY25 will be when land is acquired. Architectural and design may be in 2025 or 2026 with construction potentially from FY 2026-27. Estimates for planning, design, construction were updated to reflect current pricing and potential escalations through 2027.		
Funding Strategy		
This project is partially funded by Surtax. The remaining amount of \$9,161,160 is TBD.		
Expenditures to date \$0		

Operation Budget Impact

This project will have a significant impact on operational and personnel costs. With the opening of the new Fire Station, additional staffing will be needed to meet the service level needs of the District. These costs will be adjusted when they become more defined.

Strategic Pillar						
Safe Community						
Project Description						
This project would fund six 24/7 Controlled Access dispensers to EMS Supplies and Pharmaceuticals with real time reporting.						
Project Rationale						
The dispensers will aid in controlling access, tracking of inventory to better realize accurate budgeting and dispensing of products to eliminate waste. These machines work with our current inventory system to generate dispensing histories, low stock alerts, expiring meds/product, and generates pick lists for restocking. A dispenser would be readily available at each fire station. This project would lessen man hours used to hand inventory stock levels. It would also lessen product loss due to expiration and par levels that should be adjusted whether that be lower or higher based on volume usage, etc. Current recurring is \$10,000 for RFID. This would be eliminated with the purchase of these. Currently our rescues must go out of service to replenish medical supplies and medications, at our Logistics office, which is located at one station, after emergency calls. As call volume continues to increase, response times will increase, and availability of units will decrease as they are replenishing supplies. Having these medical supply dispensers located at each station, will lessen their travel time to replenish and keep them in service/available for calls.						
Funding Strategy						
This project is funded with Impact Fees.						
Expenditures to date \$48,964

3,941,730							
Strategic Pillar							
Safe Community							
Project Description							
This project is for the construction of a storage building for our Logistics Operation. Project funding amount was revised based on updated construction costs.							
Project Rationale							
With the growth of the city and increase need for storage area for reserve fleet and logistical supplies, Fire Rescue is planning for a storage building to support the growing department. This building would have the ability to house reserve units and protect them from the elements as well as provide an area for our logistics and maintenance personnel, as we have outgrown available space at Station 84 where they are currently located.							
Funding Strategy							
This project is currently unfunded for FY 2026. Some funding is assigned via Surtax IV in FY30-39, however there is an immediate need for this building should additional funding become available sooner. There is a funding shortfall in FY 30-39.							
Operation Budget Impact							
Operating impacts include building maintenance, utilities, and miscellaneous supplies.

Project Description								
Scheduled replacement of existing extrication equipment.								
Project Rationale								
Fire Rescue's extrication equipment is subject to heavy wear and tear due to the nature of it's use. Fire Rescue schedules replacement to ensure proper function and operation during high risk extrication and rescue emergencies. This equipment undergoes annual and periodic maintenance as needed but will require agency wide replacement in 2027.								
Funding Strategy								
This project will be funded by District Renewal and Replacement.								
Operation Budget Impact

Safe Community						
Project Description						
Staff is recommending the driving track located on Price Boulevard be brought up to meet today's standards of the Florida Department of Law Enforcement.						
Project Rationale						
In the 1990's, a certified law enforcement driving track was constructed for the purpose of law enforcement driver training for local law enforcement. The driving track does not meet today's Florida Department of Law Enforcement (FDLE) standards. The current driving track is certified under a "grandfather" clause with the state and any changes or addition to the track will break the grandfather clause a new driving track 300 x 600 would have to be constructed to meet today's FDLE standards. In 2019, the Sarasota County School Board and the City of North Port canceled a Usage and Maintenance Agreement, and the property was turned back over to the City of North Port. It is the intention to have the current driving track land and the Public Works Department land next to the driving track that is currently occupied by the Utilities Department become a Public Safety Complex to where Police and Fire, both local and surrounding, can utilize the driving track for training purposes. In FY2024, \$70,000 was requested to complete a Master Plan for design of the entire Public Safety Complex, that will provide a site assessment, conceptual design, cost estimate of construction and a program needs assessment such as but not limited to; a new driving track, fire tower (current), shoot house, indoor classrooms, indoor staff offices, indoor gun range, obedience and agility course for K9 and various other site location for Police and Fire training props throughout the complex.						
Funding Strategy						
Requesting this project to be funded by Surtax.						
Expenditures to date \$168,461						
Operation Budget Impact						
Operating costs will be determined upon completion of planning and design.

Safe Community						
Project Description						
Planning, design, and construction of a building for multi-use of Police Department Units.						
Project Rationale						
The Department is operating above 185% space capacity. The City of North Port is rapidly growing in population, commercial business and entertainment venues. The growth of these areas is causing an increase in service levels across the entire operations of the Police Department. The need to expand or build a new Police Department Headquarters is immediate. On April of 2022, Commission approved and awarded Professional Architectural and Engineering Services, Schenkel & Shultz, Inc. to conduct architectural/engineering and construction analysis on renovations and additions costs to the current Police Department Headquarters, a design of a new Emergency Operations Center and a design of a new Police Headquarters. Additionally, Schenkel & Shultz completed an analysis on a Facility Space Needs and a Staff Study that included current staffing needs and a projected growth of department personnel. On March 2nd, 2023, Schenkel & Shultz provided a presentation to Commission with the recommendation of building an entirely new Police Headquarters in lieu of renovating and expanding the current Headquarters. Commission unanimously approved the recommendations from Schenkel & Shultz and directed the City Manager to bring back a new site location and to find available funding for the purchasing of the land. Commission further approved a thirty 30% design build of the new Police Headquarters and EOC once the site location is approved by Commission. On April 2, 2024, Commission approved to seek funding for 100% design build for the new PD HQ design that takes the department's growth to 2065.						
Funding Strategy						
This project is funded using Surtax allocation. Source of additional funding has not yet been determined.						
Expenditures to date \$5,871,220						
Operation Budget Impact						
Operating costs will be determined upon design completion.

Project Description					
Purchase of additional and replacement License Plate Readers (LPRs) and associated equipment to be installed throughout the city as well as one portable, trailer mounted unit.					
Project Rationale					
To continue enhancing community safety and maintaining efficiency, this project is for the allocation of funds for the expansion and replacement of License Plate Recognition (LPR) systems. To increase coverage in key areas, this request includes the installation of new cameras and communication boxes at key locations: Sumter/41, Biscayne/41, and Biscayne/Trionfo, and a portable LPR and trailer mount for specialized event needs. Additionally, this project includes the replacement of communication boxes and existing cameras to ensure continued reliability and performance on aging LPRs that are currently in place.					
This project will strengthen the ability to detect and alert authorities to potential threats, contributing to overall public safety.					
Funding Strategy					
This project is funded by general funds and Surtax.					
Operation Budget Impact					
Operating impacts include as needed repair and maintenance costs as well as license fees per camera, which includes software and updates.

Infrastructure & Facilities Integrity							
Project Description							
Final plans for this project include essential improvements to approximately 2.8 miles of Price Boulevard between Sumter Boulevard and Toledo Blade Boulevard. The new road section will have two lanes in each direction and a continuous bi-directional turn lane down the center, 10-foot-wide concrete multi-use paths will be provided on both sides, and the roadside swales will be replaced with a closed curb and gutter drainage system. The project also includes improvements to the Utilities system within the project footprint. Additionally, this project includes engineering, permitting and design of the Myakkahatchee Creek Bridge.							
Project Rationale							
This project will improve the traffic flow between Sumter Boulevard and Toledo Blade Boulevard as well as harden the waterway crossings.							
Funding Strategy							
This Project is funded with the following sources: Road & Drainage District, Escheated Lots, Transportation Impact Fees, Surtax, Price Construction Bond, Tree, and Utility Revenue Fund. The City was also awarded \$1,500,000 in grant funding for this project from the Florida Department of Transportation.							
Expenditures to date \$11,519,252							
Operation Budget Impact							
The operating impact of this project includes the addition of general maintenance for the roadway, maintenance and electrical for streetlights and retention pond maintenance. Future maintenance costs for utilities include the water line and hydrants and will be calculated when design is complete.

Infrastructure & Facilities Integrity								
Project Description								
Public Works Phase II is anticipated for construction in 2027, and includes buildings for personnel, equipment and supply storage, parking areas and an outdoor Fleet Management Division repair facility.								
Project Rationale								
Phase I of the Public Works Facility Master Site Plan was completed in 2012 with construction of the Fleet/Administration building and parking areas. The existing modular buildings that house the Facilities Maintenance Division and Solid Waste Division staff, and the modular units installed following hurricane damage to the dated Operations and Maintenance Division would be removed and additional buildings, parking and stormwater management will be constructed on the current site. Design is underway, and a Space Needs Assessment and conceptual plan has been drafted.								
Funding Strategy								
This Project is funded by Road & Drainage District funds, Solid Waste District funds, Fleet Management Funds and General Government Impact Fees.								
Expenditures to date \$406,509								
Operation Budget Impact								
When the Project has appropriated funding, any operating impacts will be determined at that time.

Project Description		
The City of North Port and Charlotte County entered into an Interlocal Agreement for the study and design of intersection improvements at Hillsborough Boulevard and Cranberry Boulevard. The Intersection Alignment Study was completed in Fiscal Year 2021. The Design/Permitting Phase identified land acquisition needs and began in Fiscal Year 2022. An Interlocal Agreement with Charlotte County for reimbursement for construction services is currently in negotiations. Once executed, this funding is anticipated to address the future funding requirement. Construction completion is anticipated in Fiscal Year 2026.		
Project Rationale		
Project costs are split 50/50 between the City of North Port and Charlotte County. Study costs are \$142,393.04 and design costs are \$393,160. Estimated land acquisition costs are \$142,400.00. The draft study has estimated construction costs at \$4,588,715		
Funding Strategy		
This project is funded by Road & Drainage District funds, Impact Fees, Surtax funds, and funding reimbursement for design costs by Charlotte County (Outside Agency). An agreement with Charlotte County to provide reimbursement for 50% of construction costs for this project is currently in negotiations.		
Expenditures to date \$709,656		
Reimbursement to date \$296,166		
Operation Budget Impact		
Future operating costs will be determined after the project design is determined.

Project Description							
Construction of a series of linear parking spaces along Tamiami Trail in three phases; as well as Commission directed amenities such as benches and minor landscaping be added to the multi-modal path constructed by the Florida Department of Transportation between Tuscola Boulevard and Ortiz Boulevard.							
Phase 1 will add an estimated 49 parking spaces on the south side of U.S.41 between Bolander Terrace and North Port Blvd							
Phase 2 will add an estimated 42 parking spaces on the south side of U.S. 41 between North Port Blvd and Almonte Terrace							
Phase 3 will add an estimated 72 parking spaces on the north side of U.S. 41 between North port Blvd and Espanola Ave							
Project Rationale							
This project will provide greater appeal for the public to utilize the multimodal path between Tuscola Boulevard and Ortiz Boulevard and added parking along the Tamiami Trail frontage road, south of US 41 between Bolander Terrace and North Port Boulevard, and Landover Terrace and Almonte Terrace, and along the Tamiami Trail frontage road, north of US 41 between North Port Boulevard and Espanola Drive.							
Funding Strategy							
Phase 1 of this project is funded by Surtax. Funding has not yet been identified for phases 2 and 3.							
Expenditures to date \$96,586							
Operation Budget Impact							
Operation impact will be determined after project design is completed.

Project Description						
Annual Project for Rehabilitation of City Bridges. The Department of Public Works identified the bridge at North Port Boulevard and the Cocoplum Waterway for Rehabilitation with design currently in process and construction anticipated in Fiscal Year 2026.						
Project Rationale						
City bridges are inspected annually by the Florida Department of Transportation and a report is provided to the Department of Public Works. Deficiencies identified in the report are reviewed and corrective actions are required by the City to ensure a reliable transportation network.						
Funding Strategy						
This Project is funded by Surtax.						
This project has been approved for reimbursement funding from the RSRQ CDBG-DR Funds in the amount of \$106,000.						
Expenditures to date \$190,469						
Operation Budget Impact						
No operating budget impact is expected.

Project Description						
Project is funded for design and permitting of Water Control Structure (WCS) 114 located on the Snover Waterway at North Salford Boulevard. Funding originally included in this project was moved to help fund the Price Boulevard Widening Project. Since this project is shovel ready it will likely be rated high during anticipated upcoming infrastructure grant opportunities. Staff will pursue those opportunities to fund this infrastructure.						
Project Rationale						
The entire structure is deteriorated and in need of replacement.						
Funding Strategy						
This project is funded by Road and Drainage District funds.						
Expenditures to date \$148,264.						
Operation Budget Impact						
No operational impact expected.

Infrastructure & Facilities Integrity							
Project Description							
Construct a traffic signal on Sumter Boulevard at the I-75 northbound entrance and exit ramps. Planning and design in Fiscal Year 2022 and construction in Fiscal Year 2025. Staff coordinated efforts with the Florida Department of Transportation (FDOT) to develop a local funding agreement and project timeline. Additionally, a \$2,000,000 federal grant was awarded to FDOT and applied to the joint project.							
Project Rationale							
There are extremely long queues in the morning and evening peak hours at the I-75 interchange at Sumter Boulevard creating unsafe conditions. The installation of the traffic signal can greatly improve the operations and safety of this interchange.							
Funding Strategy							
Transportation Impact Fees have been allocated for this project, which will be completed in coordination with FDOT under a local funding agreement.							
Expenditures to date \$3,000,000							
Operation Budget Impact							
Depending on the terms of any agreement with FDOT, Operational impacts may include signal maintenance.

0	0	0
FY 2030	Future Funding	
0	900,116	
Strategic Pillar		
Infrastructure & Facilities Integrity		
Project Description		
Project plan is to construct a ten-foot wide multi-use path along the southeasterly right-of-way on Ponce De Leon Boulevard from Skyview Drive to Hornbuckle Boulevard. Originally, this was to connect to the Tropicair multiuse path, however efforts for that project have been discontinued as per Commission direction. Design has been completed. The following funding has been moved to Price Boulevard Widening project and this path is on hold (107-5000-541.63-00: \$136,376.00, and 306-5000-541.63-00:\$448,329.00).		
Project Rationale		
Construction of sidewalks/multi-use paths provides non-vehicular connectivity for residents. Each year, funding is appropriated to design and construct sidewalks/multi-use paths to provide safe pedestrian travel primarily within a 2-mile radius of schools, and secondarily, on all arterial and collector roads. When completed this section will continue the existing sidewalk on Ponce De Leon Boulevard that ends at Skyview Drive.		
Funding Strategy		
Originally this project had CDBG funding, however following changes in grant funding allocation this project no longer qualified for grant funding. The Department of Public Works moved District and Surtax funds into this project to fund, however those funds were needed for Price Boulevard Widening. This project is now on hold waiting funding or further direction.		
Expenditures to date: \$53,554		
Operation Budget Impact		
The operating impact of this Project will include finished mowing costs and sidewalk repairs.

Project Description		
Staff investigated potential improvements necessary to permit development at the northwest corner of Cranberry Boulevard and Toledo Blade Boulevard at the parcels known as "Suncoast Technical College Commercial Outparcels". After an in-depth analysis by a traffic consultant, staff identified a few improvements that would allow the site to operate within a reasonable level of service. Since some of these improvements help to accommodate existing city traffic, Construction costs of the improvements will be split with the developer. Staff received cost estimates the construction of these improvements. Staff will present a Development Master Plan (DMP) and a Developer's Agreement to the City Commission for review as part of the DMP package. The Developer's Agreement will have a cost sharing component with the City's share being approximately \$304,810.		
Project Rationale		
Improvements to the transportation network in response to city growth is a priority of the City Commission and residents.		
Funding Strategy		
This project is funded by Transportation Impact Fees. The City's share of these improvements will be approximately \$304,810.

Infrastructure & Facilities Integrity						
Project Description						
Design and permit Water Control Structure Fixed Weir (FW) 157. Design started in Fiscal Year 2025. Project will be shovel ready and will likely score well on anticipated upcoming infrastructure grant opportunities. Due to location and similar design, FW 157 will be designed and constructed with FW 158. FW 157 is on the Snover Waterway just west of I75. FW 158 is on the Snover Waterway just east of I75. Staff will seek grant funds to construct both WCS 157 and WCS158.						
Project Rationale						
The entire structure is deteriorated and in need of replacement.						
Funding Strategy						
Design for this project is funded by Road and Drainage District funds.						
Expenditures To Date \$0						
Operation Budget Impact						
No operational impact expected.

56,330	56,330	0	0	0	0	5,500,000
Strategic Pillar						
Infrastructure & Facilities Integrity						
Project Description						
It is the goal of the City of North Port to expand access to I-75 through our city. Access to Yorkshire Street, and the associated Activity Center 6, is seen as a powerful step to ensuring growth. This project would consist of constructing two new interchanges at the I-75 northbound and southbound entrance and exit ramps. Planning and design took place in Fiscal Year 2023 and construction is anticipated in Fiscal Year 2026-2030. The Yorkshire/Raintree at I-75 Interchange (s) was a discussion item on the January 23, 2023, Joint Meeting Agenda for the Charlotte County – Punta Gorda MPO and Sarasota – Manatee MPO. Both entities, at the suggestion of the Florida Department of Transportation (FDOT) including the City of North Port City Commission and Charlotte County Board of County Commissioners, have been working together and taking a unified approach to make the interchanges a reality. Both the City of North Port City Commission and Charlotte County Board of County Commissioners have passed Resolution 2022-R-69 and 2022-151 respectfully, supporting construction of the interchanges.						
Project Rationale						
There are extremely long queues in the morning and evening peak hours at the I-75 interchange at Toledo Blade Boulevard and Kings Highway creating unsafe conditions. The installation of the two new interchanges can greatly improve the operations and safety of this traffic for the City of North Port Residents.						
Funding Strategy						
As the Florida Department of Transportation (FDOT) will not have this improvement on their project list until at least 2027, the quickest alternative is for the City to move forward with design and apply for construction grants including FDOT Local Agency Program (LAP) funding and coordination with Charlotte County. Transportation Impact Funds have been allocated for the Plan/Design/Engineering phase.						
Expenditures To Date \$0

Project Description							
The Department of Public Works seeks to acquire land and construct bridge connectivity over the Cosmic Waterway between Madagascar Ave and Cranberry Boulevard. This new connector bridge is needed to provide additional connectivity between Sumter Boulevard and Toledo Blade Boulevard and provide a secondary east west route in the event of a Price Boulevard road closure. Design work of the crossing is currently underway.							
Project Rationale							
Citywide connectivity is a priority of the City Commission and residents.							
Funding Strategy							
This project is funded by Road & Drainage District funds and Transportation Impact Fees.							
Expenditures to date \$360							
Operation Budget Impact							
The operating impact of this project will include bridge maintenance.

582,175	582,175	0	0	0	0	0
Strategic Pillar						
Infrastructure & Facilities Integrity						
Project Description						
Hurricane Ian caused irreparable damage to the former Public Works Operations building. This project involves constructing a three-sided, open-air pole barn that will serve as a covered area for Road and Drainage Field Operations staff briefings, minor equipment repairs, and miscellaneous equipment storage. The facility will replace the functions lost due to the demolition of the damaged operations building. While staff have been temporarily relocated to trailer units, the original building also served as a storage space for essential materials and a gathering place for operational staff functions that will be restored with the new structure.						
Project Rationale						
The new pole barn building is a necessary replacement for the former Public Works Operations building, which was rendered unusable by Hurricane Ian. The damaged facility previously supported essential functions such as staff briefings, minor equipment repairs, and secure storage of operational materials and activities that are now hindered by the lack of a permanent, functional space. While staff have temporarily relocated to trailers, these do not adequately support the full range of operational needs. The proposed open air pole barn will restore lost capabilities, improve workflow efficiency, and ensure that field operations are conducted safely and effectively, justifying the investment in this critical infrastructure.						
Funding Strategy						
This project is funded by the Road and Drainage District funds and Insurance recoveries						
Operation Budget Impact						
There will be increased annual cost for electrical services

Design, permit and reconstruction of Water Control Structure (WCS) 121. Design will start in Fiscal Year 2025 with construction anticipated to start in Fiscal Year 2026. WCS 121 is located on the MacCaughy Waterway near Nimbus Drive and Pope Street.							
Project Rationale							
The entire structure is extremely deteriorated and in need of replacement. The proper operation of this gated structure is critical for releasing water from the City conveyance system to the Cocoplum waterway.							
Funding Strategy							
This project is funded by \$1,773,790 in Road and Drainage District Funds.							
*This project has also been approved for RSRQ CDBG-DR funding in the amount of \$2,042,000, pending the full execution of the grant agreement.							
Expenditures to date \$0							
Operation Budget Impact							
The operating impact of this project will include electrical costs for automated motorized gates with telemetry, and will be determined during the construction phase.

Infrastructure & Facilities Integrity

Project Description

The Road and Drainage District is seeking to replace the bridge at Inkwood Drive over Little Field Waterway. This bridge has been identified as a bridge in need of replacement. Initially, Florida Department of Transportation (FDOT) extended a grant to assist with bridge replacement, however due to changes in FDOT grant program and project approach, this bridge no longer qualifies for the FDOT grant program. The Department of Public Works will seek additional opportunities for future grants for this bridge replacement. Current construction estimate is \$1,890,000.

Project Rationale

City bridges are inspected annually by Florida Department of Transportation and a report is provided to the city. Deficiencies identified in the report are reviewed and corrective actions are taken by the City.

Funding Strategy

This project is funded by Road & Drainage District Funds.

Operation Budget Impact

No operating budget impact is expected.

Project Description						
Design, permit and reconstruction of Water Control Structure (WCS) 120. Design will start in Fiscal Year 2027 with construction anticipated to start in Fiscal Year 2028. WCS 120 is on the Blue Ridge Waterway at the corner of Langtree Avenue and Tripoli Street.						
Project Rationale						
The entire structure is extremely deteriorated and needs to be modified to a gated structure. The proper operation of this gated structure is critical for releasing water from the City conveyance system to the Cocoplum Waterway. Design is scheduled for Fiscal Year 2027 and construction for Fiscal Year 2028.						
Funding Strategy						
This project will be funded by Road & Drainage District Funds. The City is also planning to submit an application for a Federal Hazard Mitigating Grant Program (HMGP) 75% reimbursement grant in the amount of \$3,000,000.						
Operation Budget Impact						
The operating impact of this project will include electrical costs for automated motorized gates with telemetry, and will be determined during the construction phase.

Infrastructure & Facilities Integrity		
Project Description		
The Facilities Maintenance Division is seeking to upgrade security systems in City Hall to include access control upgrades and improvements to physical access and building protection.		
Project Rationale		
The Facilities Maintenance Division is in need of security upgrades to provide efficient and effective infrastructure to residents and City Staff related to the daily use of City facilities. Upgrades will bring the City Hall facility closer to national security standards of protection. Effective security at city facilities support increased safety for those who visit or work in the building.		
Funding Strategy		
This project is funded by General funds.		
Expenditures to date \$243,269		
Operation Budget Impact		
The operational impact has been for the upgrade, replacement and new systems added. Moving forward will be much easier to maintain and less expensive long range.

FY 2030	Future Funding	
0	1,125,000	
Strategic Pillar		
Infrastructure & Facilities Integrity		
Project Description		
This project is harden existing Fire Station 83 to bring it up to current code. The project hardening would include: Replacement of the roof system with a standing-seam galvalume roof; additional bracing to the trusses (most likely); new lightning protection, gutters and downspouts; remove and replace all windows/storefront with insulated, tinted Level E assemblies; remove and replace all man-doors, including frame, hardware, painting, etc.; remove and replace all apparatus bay doors to include new garage door openers; remove and replace louvers/ exhaust fans as needed.		
Project Rationale		
Hardening the facility would allow the fire station to serve as a responder shelter for fire rescue crews. Ensuring the safety of this facility would allow crews to remain inside and begin response operations immediately following the passing of a storm, maximizing response times and ensuring the greatest extent of life saving measures.		
Funding Strategy		
This project is proposed through Sarasota County Unified Local Mitigation Strategy to receive funding from the Federal Emergency Management Agency's Hazard Mitigation Grant Program. The total proposed cost of the project is \$1,500,000. Grant funding will cover 75% of the project, and the remaining 25% will be funded through local cost match needed in FY 26, which is being requested through this project.		
Operation Budget Impact		
No operational impacts are expected.

130,000	0	130,000	0	0	0	0	0	
Strategic Pillar								
Infrastructure & Facilities Integrity								
Project Description								
Replacement of the HVAC system at Fire Station 83.								
Project Rationale								
Fire Station No. 83 is in need of major HVAC component replacements. Replacement is programed in FY2026 at an estimated cost of \$130,000. Addressing deferred maintenance and planning for replacement of infrastructure components supports increased safety for those who visit or work in the building and helps to avoid unplanned work interruption due to failed equipment.								
Funding Strategy								
The costs of this replacement will be split 50/50 between Facilities Maintenance and Fire Rescue, using General Fund and District Renewal and Replacement funds.								
Operation Budget Impact								
Projects to address deferred maintenance are expected to result in improved operation of facility infrastructure. Moving forward the facility will be easier to maintain and if maintenance levels are supported via budget, the City will likely see less expensive long-range repairs to address failed infrastructure.

Infrastructure & Facilities Integrity						
Project Description						
The Facilities Maintenance Division is seeking to make improvements to City Hall including a roof replacement and window and door improvements to harden the facility for storm events. This is a grant related project that will have a 75% reimbursement return. This project will begin to address the deferred maintenance to this critical infrastructure.						
Project Rationale						
The hardening of City Hall will increase the building's resiliency during a major storm event and will support the ability for staff to provide emergency response services. Effective operational facilities at the City provide increased safety for those who visit or work in the building.						
Funding Strategy						
This project is funded by General funds. This project is a 75% refunded grant eligible.						
Total of \$4,475,526.00. \$3,356,650 from Federal Share - FEMA (pass through FDEM). \$1,118,876 from City's Share The City is responsible for a 25% match estimated at \$1.118 million. Matching funds will be allocated from SB4A Ian recoveries first. Any remaining matching funds will need to be budgeted in the General Government Repair and Replacement Fund, General Fund, or other funding source.						
Operation Budget Impact						
The operational impact has been for the upgrade, replacement and new building components added. Moving forward will be much easier to maintain and less expensive long range.

Strategic Pillar					
Infrastructure & Facilities Integrity					
Project Description					
The Facilities Maintenance Division seeks to purchase mobile generators and to install connection ports at identified City facilities to allow the use of a mobile generator as an alternate power source if required due to emergency events. During hurricane response in 2024, many City facilities faced issues with generators leaving some buildings unusable for emergency response. This project will allow the City to continue response from critical facilities during an emergency in the event of generator failure.					
Project Rationale					
During hurricane response in 2024, many City facilities faced issues with generators leaving some buildings unusable for emergency response. The Facilities Maintenance Division is seeking to purchase portable generators and to install connection ports at identified City facilities to allow the deployment of a generator if needed during an emergency. This project will allow the City to adjust response during an emergency in the event of generator failure.					
Funding Strategy					
This project is funded by General funds.					
Operation Budget Impact					
Operational impacts will be dependent on deployment of the unit and duration of the response, including staff time to mobilize and fuel to operate the unit.

Strategic Pillar

Infrastructure & Facilities Integrity

Project Description

Design, build and operate a Solid Waste Transfer Station to manage the City of North Port's solid waste safely and efficiently. Land for the Transfer Station has been obtained. Design and engineering via Construction Manager at Risk (CMaR) is underway.

Project Rationale

The Transfer Station will support ongoing efficient solid waste collection, more beneficial disposal options, and the ability to accommodate population growth. Implementation of a transfer station reduces the number of trips to the landfill, saving fuel, staff time and vehicle wear and tear. The estimated cost savings over a five year period is approximately \$13,050,100.

Funding Strategy

Debt financing for this project was not approved during the May 13, 2025 referendum. Currently, the planned funding progression allows for funding to come from Solid Waste Impact Fees and Surtax Funds.

Expenditures To Date \$158,626

Operation Budget Impact

Budget impacts associated with the facility will apply after Fiscal Year 2026.

Strategic Pillar							
Infrastructure & Facilities Integrity							
Project Description							
Needs and site selection analysis, design, permitting, and construction of a new administration and field operations building.							
Project Rationale							
The administration building that was located on Price Boulevard was not adequately sized to support the staff that use to work out of that facility. The existing site is adjacent to the training track for Police and Fire, which is also near an archeological site; therefore, no additional property is available in the immediate vicinity to expand the existing site. The building has been damaged by Hurricane Ian and a majority of the Utilities staff are working in temporary modular offices until the finalization of the new Administration Building & Field Operations Center.							
Funding Strategy							
This project is funded by Utilities funds, Water Capacity Fees, and Sewer Capacity Fees.							
Expenditures to date: \$10,148,618							
Operation Budget Impact							
With a larger parcel of land and building, there would be additional maintenance and electrical costs. Operational expenditures are anticipated to be budgeted in Fiscal Year 2027.							
Project Image

Strategic Pillar

Infrastructure & Facilities Integrity

Project Description

Fiscal Year 2021 included design for Haberland Boulevard, Woodhaven Drive/Bobcat Trail and North Toledo Blade Boulevard Bridges. Construction is anticipated to commence in fiscal year 2022.

Project Rationale

To improve the potable water distribution system reliability to the residents of the City. The project is in various locations in the City. Replacement of aged water lines on three bridges is planned, with additional ones in the future. Old steel water lines on bridges have reached end of their service life and pipe deterioration and leaks are on pipe bends that cannot be readily repaired. Some very small leaks are unable to be stopped at this time resulting in un-billed water loss.

Funding Strategy

This program will be funded by Surtax and Utilities funds.

Expenditures to date \$444,323

Operation Budget Impact

Replacement of these pipelines will prevent potential catastrophic failure and emergency repairs, which will be more costly than current planned replacements.

1,608,295	1,608,295	0	0	0	0	0	
Strategic Pillar							
Infrastructure & Facilities Integrity							
Project Description							
The project is in various locations of the City. Project locations to be determined and prioritized based on results of fire flow and water quality dynamic hydraulic modeling. The focus areas for Fiscal Year 2021 were S. Hartsdale Street, Aldovin and Totem Avenues. The focus areas for design in Fiscal Year 2022 will be Lamplighter and Rockwell Avenues, Renault Circle, Meroni Boulevard, and Ridgewood Drive with construction to follow.							
Project Rationale							
To improve potable water distribution system reliability, fire flow, water quality and pressure as well as reduce the amount of flushing necessary to maintain water quality. The project is in various locations of the city. Project locations to be determined and prioritized based on results of fire flow and water quality dynamic hydraulic modeling. Some existing potable piping exceeds 40 years of age and the scattered design of water "distribution" lines with many less than 6" diameter is detrimental to the overall system. Throughout the city, improvements are needed to replace old asbestos cement lines, increase system reliability and fire flow, water quality and pressure, and reduce flushing. The community, as a whole benefits from these projects since the water system supplies water to institutional/commercial/industrial developments.							
Funding Strategy							
This project will be funded with Surtax and Utilities Funds. The City also received a grant from SWFWMD.							
Expenditures to date \$1,287,802							
Operation Budget Impact							
Addition of new pipeline to the distribution system inherently increases operation costs over time. However, improvements should also decrease operations costs by improving water quality in the system, as applicable, and by replacing old asbestos cement main with new, as applicable.

Strategic Pillar																	
Infrastructure & Facilities Integrity																	
Project Description																	
This project is to program rehabilitation and improvement projects at the Pan American Wastewater Treatment Plant (WWTP).																	
Project Rationale																	
This project is to program rehabilitation and improvement projects at the City's Wastewater Treatment Plants (WWTP). In fiscal year 2026, the WWTP rehabilitation and upgrades will include Pan American digester lift station rehabilitation.																	
Funding the effluent pump station improvements and force main project is the priority for fiscal year 2026. The inability to dispose of flow during heavy rainfall events caused an unpermitted discharge to surface water during August of 2024, which resulted in a notice of violation and a consent order issued March 2025 from FLDEP. All other identified projects in the CIP had to be delayed due to funding constraints.																	
The other improvements identified for fiscal year 2026 at the Pan American Plant were: control panel replacement, chlorine contact tank sealing and coating, replacement of the headworks reuse water pipes, and installation of ammonia and nitrate analyzers. Improvements at the Southwest Plant were: replacement of the chemical fee system and installation of a new water supply pipe for the odor control system. All the above projects had to be deferred to fiscal year 2027 due to lack of funding.																	
Funding Strategy																	
This project will be funded by Utilities funds.																	
Expenditures to date: \$1,595,238																	
Operation Budget Impact																	
All the improvements made at the wastewater treatment plant will not require any increase in repairs and maintenance since it will be new equipment.

			FY 2027	FY 2028	FY 2029	FY 2030
959,680	959,680	0	0	0	0	0
Strategic Pillar						
Infrastructure & Facilities Integrity						
Project Description						
Install a drying bed at the Southwest Wastewater Reclamation Facility to decant the Vacuum Trucks after jetting and cleaning wastewater collection system lines and routinely cleaning and inspecting lift stations to remove heavy rags and debris. This prevents premature pump failure and improves overall operational efficiencies in the collection system.						
Project Rationale						
In 2017 Utilities purchased a vehicle for televising gravity lines. In 2018, Utilities purchased a new Vacuum truck for jetting and cleaning gravity lines and lift stations. With this equipment, Utilities has an ongoing program for cleaning and televising wastewater collection system gravity lines. The grit and debris from this activity is discharged onto a drying bed to allow the water to drain off and the rags and debris can then be picked up and disposed of properly without damaging pumps, motors or disrupting the treatment plant process. In years past, this was done at our neighboring Utilities, Charlotte County and the City of Venice. Previously, this was done on a quarterly basis, but with the increase in frequency and the daily schedule of cleaning and televising, this has become a weekly need. Our neighboring Utilities have informed us that they cannot continue with this frequency and that we need to find another solution. Additionally, Senate Bill 712 puts a focus on wastewater collection system maintenance to reduce inflow and infiltration and increases fines associated with sanitary sewer overflows.						
Funding Strategy						
This project will be funded by Utilities Fund.						
Expenditures to date \$710,149						
Operation Budget Impact						
Without a drying bed Utilities could lose the opportunity to apply for future grant funding for the Inflow and Infiltration program. Utilities would need to revert back to reactionary wastewater collection system maintenance rather than being proactive. This can also lead to premature failures at lift stations, blockages in the gravity mains and ultimately could lead to sanitary sewer overflows and environmental impacts.

Project Rationale																				
This project is for the rehabilitation of the raw water intake structures on the Myakkahatchee Creek and Cocoplum Waterway. The intake structures on the Myakkahatchee Creek were constructed in approximately 1964 and 1974. The screens, sluice gates and other portions of the structures are deteriorating which may compromise the ability to withdraw water from the Myakkahatchee Creek for production purposes. The Cocoplum Water intake structure is significantly newer and only limited work is anticipated on that structure. An evaluation of all three structures was performed in FY 20/21 and design was completed in 2023/2024. Construction of the Myakkahatchee Creek intake improvements will be completed in 2027 and the Cocoplum intake improvements and associated intake water pipe improvements will be constructed in 2028. Funding the effluent pump station improvements and force main project is the priority for fiscal year 2026. The inability to dispose of flow during heavy rainfall events caused an unpermitted discharge to surface water during August of 2024, which resulted in a notice of violation and a consent order issued March 2025 from FLDEP. All other identified projects in the CIP had to be delayed due to funding constraints.																				
Funding Strategy																				
This project will be funded by Utilities funds.																				
Expenditures to date: \$189,258																				
Operation Budget Impact																				
This project is needed for the continued reliability of our surface water treatment. The inability to withdraw water from the Myakkahatchee Creek limits the production capability of the surface water treatment plant leading to purchasing more water from the Peace River Manasota Regional Water Supply Authority. Additionally, limiting the intake ability of the plant ultimately would lead to a reduce plant capability and new water sources would need to be found. Upon completion of this project, only ongoing routine maintenance would be need to the structures.

Strategic Pillar						
Infrastructure & Facilities Integrity						
Project Description						
This project includes design and construction of expanded effluent pumping station and pumping system at the Pan Am WWTP and parallel effluent force main from the plant to the deep injection well site. The upgrades will ensure that high flows during heavy rain events, can be pumped to the deep injection well. This project will also provide the effluent capabilities necessary to dispose of the full wastewater treatment plant capacity flow.						
Project Rationale						
Project is needed to ensure that high flows during heavy rain event conditions can be pumped to the deep injection well.						
Funding Strategy						
Debt financing for this project was not approved during the May 13, 2025, referendum. Utilities has been ordered by the Department of Environmental Protection to complete this project within the allowable timeframe, therefore, time is of the essence. Utilities has reallocated funding from other needed capital improvements, including the Wastewater Treatment Plant Improvement project (U21WWI), Building Upgrades at the Pan American Wastewater Treatment Plant (U24SBU), Raw Water Intake Structure Rehabilitation (U22WIS), and the Myakkahatchee Creek Water Treatment Plant Improvement project (U23WPI). However, delays in these projects may result in higher project costs when implemented later and will impact efficiency of operations. Staff was directed at the May 27, 2025, Commission Meeting to continue to explore alternative funding mechanisms to include P3, line of credit, State Revolving Loans, Developer Agreements, and Certificate of Participation (COPs).						
Expenditures to date: \$406,238						
Operation Budget Impact						
There are no operational impacts anticipated at this time.

Infrastructure & Facilities Integrity						
Project Description						
This project is to replace the structure that previously protected the centrifuge at the Pan American Wastewater Treatment Plant.						
Project Rationale						
The roof of the previous structure did not allow for access to provide the needed routine maintenance of the centrifuge. To perform maintenance of the equipment, the structure needed to be replaced with a new structure, designed to house this type of equipment. The existing structure was damaged due to Hurricane Ian and has already been removed.						
Funding Strategy						
This project is funded by Utilities funds.						
Expenditures to date \$126,192						

Operation Budget Impact

There are no operational impacts anticipated at this time.

340,000	340,000	0	0	0	0	0	0
Strategic Pillar							
Infrastructure & Facilities Integrity							
Project Description							
Fiscal year 2023 will be for the design of two bridges on Appomattox Drive with construction to follow in fiscal year 2024.							
Project Rationale							
To improve the potable water distribution system reliability to the residents of the City. The project is in various locations in the City. Replacement of aged water lines on three bridges is planned, with additional ones in the future. Old steel water lines on bridges have reached end of their service life and pipe deterioration and leaks are on pipe bends that cannot be readily repaired. Some very small leaks are unable to be stopped at this time resulting in un-billed water loss.							
Funding Strategy							
This program is funded by Surtax funds.							
Expenditures to date \$0							
Operation Budget Impact							
Replacement of these pipelines will prevent potential catastrophic failure and emergency repairs, which will be more costly than current planned replacements.

Strategic Pillar							
Infrastructure & Facilities Integrity							
Project Description							
A Public Works road project located at the intersection of Hillsborough Blvd and Cranberry Blvd includes the construction of a round-about and widening of Hillsborough Blvd. This project conflicts with the existing water main located at the same intersection, therefore, the main will need to be relocated. Phase 1 will include the water main replacement, which will extend from the intersection approximately two miles down Hillsborough Blvd to the Hillsborough Booster Station. Phase 2 is the extension of the 16-inch water main to the Hillsborough Booster Station, which will replace the undersized asbestos cement pipe.							
Project Rationale							
This project is a replacement and relocation of a water main due to road construction.							
Funding Strategy							
This project is funded by Utilities funds.							
Expenditures to date: \$113,592

Project Description							
This project is to program rehabilitation and improvement projects at the Myakkahatchee Creek Water Treatment Plant.							
Project Rationale							
This project is to program rehabilitation and improvement projects at the Myakkahatchee Creek Water Treatment Plant (MCWTP), Southwest Water Treatment Plant, and Water Booster Station.							
Funding the effluent pump station improvements and force main project is the priority for fiscal year 2026. The inability to dispose of flow during heavy rainfall events caused an unpermitted discharge to surface water during August of 2024, which resulted in a notice of violation and a consent order issued March 2025 from FLDEP. All other identified projects in the CIP had to be delayed due to funding constraints.							
In fiscal year 2026, the MCWTP rehabilitation and upgrades identified included , security upgrades, bulk chemical tank replacements, clarifier coating, mechanical and electrical improvements, installation of critical process instrumentation equipment, & variable frequency drive replacements. The improvements at the Southwest plant include a powder activated carbon system and a Lightning Protection System. Improvements at the Booster Station include Replacement of Diesel Storage Tank, Generator Replacement, and Fencing Replacement. All of the listed projects had to be deferred to fiscal year 2027 due to funding constraints.							
Funding Strategy							
This project is funded by Utilities funds.							
Expenditures to date \$555,335							
Operation Budget Impact							
There are no operational impacts anticipated at this time.

Strategic Pillar						
Infrastructure & Facilities Integrity						
Project Description						
This project is for additional design services to prepare engineering plans, specifications and estimates for competitive bidding for the water and wastewater main construction needed to expand Price Boulevard to 5 lanes within the existing 100-foot right-of-way between Sumter Boulevard and Toledo Blade Boulevard.						
Project Rationale						
Design for the Utilities portion of the Price Blvd widening project was previously completed under U15PW1, which was closed in March of 2022. Since this project began once again moving forward to construction it has become apparent that design changes are needed to ensure the wastewater force main being installed in conjunction with the roadway widening is adequate to meet the increased current and future flows from the Toledo Blade/Price Blvd corridor. Construction bids exceeded estimates. A budget amendment was completed in 2025 to cover the additional costs.						
Funding Strategy						
This project is funded with Utilities funds & Surtax.						
Expenditures to date \$221,638 under U15PW1 Expenditures to date \$33,255 under U24PW1						
Operation Budget Impact						
The operating impact of this project includes to be determined future maintenance costs for the Utilities force mains, water line and hydrants.

Strategic Pillar						
Infrastructure & Facilities Integrity						
Project Description						
The shared lab and operator offices at the Pan American WWTP is original to the plant and is no longer adequate to provide works and rest spaces for plant operators.						
Project Rationale						
This project includes replacement of the reuse pump building and construction of a new building to provide plant operators with designated office space, breakroom and restroom facilities. Project also includes remodel of the shared lab/office building. To provide space for maintenance and I&C staff. Purchase of an adjacent parcel may be necessary to provide adequate space for the new office building. The shared lab and operator office building at the Pan American WWTP is original to the plant and is no longer adequate to provide work and rest spaces for plant staff. The current I&C maintenance building does not provide adequate storage for parts and components that need to be kept on hand.						
Funding the effluent pump station improvements and force main project is the priority for fiscal year 2026. The inability to dispose of flow during heavy rainfall events caused an unpermitted discharge to surface water during August of 2024, which resulted in a notice of violation and a consent order issued March 2025 from FLDEP. All other identified projects in the CIP had to be delayed due to funding constraints.						
Funding Strategy						
This project will be funded by Utilities funds.						
Operation Budget Impact						
With the increased size in space to accommodate all personnel, there will be a slight increase in electrical costs anticipated to be budgeted in fiscal year 2027.

863,085	585,085	278,000	0	0	0	0	0													
Strategic Pillar																				
Infrastructure & Facilities Integrity																				
Project Description																				
Fiscal year 2024 design includes the following areas: Yacolt Avenue, Radcliff Avenue, Wall Lane, Lemay Lane, Snowflake Lane, Marcella Terrace, and Sahara Lane with construction to follow in fiscal years 2025 and 2026.																				
Project Rationale																				
To improve potable water distribution system reliability, fire flow, water quality and pressure as well as reduce the amount of flushing necessary to maintain water quality. Some existing potable piping exceeds 40 years of age and the scattered design of water "distribution" lines with many less than 6" diameter is detrimental to the overall system. Throughout the city, improvements are needed to replace old asbestos cement lines, increase system reliability and fire flow, water quality and pressure, and reduce flushing. The community, as a whole benefits from these projects since the water system supplies water to institutional/commercial/industrial developments.																				
Funding Strategy																				
This program will be funded with Surtax and Utilities funds.																				
Expenditures to date \$159,767																				
Operation Budget Impact																				
Addition of new pipeline to the distribution system inherently increases operation costs over time. However, improvements should also decrease operations costs by improving water quality in the system and by reducing water used for flushing dead ends.

Infrastructure & Facilities Integrity																															
Project Description																															
Conversion of existing metering system to advanced metering infrastructure																															
Project Rationale																															
Utilities is upgrading the current (AMR) drive by meter reading system to an (AMI) remote reading software, which will result in upgrading the meters themselves. The new meters will be smart meters with real time data. The new meters allow for leak detection alerts and a customer portal to view and monitor usage daily. Customers can set their own alerts, such as consumption limits and continues use. These meters will move Utilities from being reactive to proactive. This will lead to water conservation for the system as a whole, while improving customer service and billing.																															
Funding Strategy																															
This project is funded by Utilities funds.																															
Expenditures to date \$0																															
Operation Budget Impact																															
Operational impacts are hard to determine at this time until the department determines what type of system it will be converted to.

Project Description		
Replacement of a 8" cast iron sewer gravity line.		
Project Rationale		
Replacing the 8" cast iron sewer gravity line beneath the Victoria Point apartment complex parking lot, spanning the distance between two manholes. The existing gravity line is severely deteriorated and nearing the end of its lifespan. Given the condition of the infrastructure, this project will necessitate the installation of sheeting and shoring for completion. Our department lacks the necessary resources and machinery to undertake this replacement internally.		
Funding Strategy		
This project is funded by Utilities funds.		
Expenditures to date \$39,537		
Operation Budget Impact		
There are no anticipated operational costs associated with this replacement.

Infrastructure & Facilities Integrity		
Project Description		
Replacement of a 6" cast iron sewer gravity line.		
Project Rationale		
Replacing 6" cast iron sewer gravity line connecting a Master manhole and a Lift Station wet well located close to a major body of water. The gravity line is in very poor condition and located under a parking lot. The 6" cast iron pipe is at the end of its life span; it was relined 3 years ago as a temporary repair and the correct course of action is to fully replace the section of piping. This project will require an estimated 20-foot-deep excavation and installation of sheeting and shoring to complete. Our department does not have the resources or machinery to perform this replacement in house.		
Funding Strategy		
This project is funded by Utilities funds.		
Expenditures to date \$58,028		
Operation Budget Impact		
There are no anticipated operational costs associated with this replacement.

Strategic Pillar						
Infrastructure & Facilities Integrity						
Project Description						
The demolition and replacement of the current powder activated carbon system.						
Project Rationale						
The current structure that contains the powder activated carbon has deteriorated to a point where replacement is necessary. There are new and more efficient ways to mix and inject the powder activated carbon into the water treatment process as well, which will update the plant process and provide more control and efficiency.						
Funding Strategy						
This project will be funded by Utilities Fund.						
Expenditures To Date \$0						

Operation Budget Impact

The water treatment process currently involves the incorporation of powder activated carbon, therefore, there are no anticipated additional operational costs.

904,000	0	0	278,000	278,000	278,000	70,000
Strategic Pillar						
Infrastructure & Facilities Integrity						
Project Description						
The water mains will be designed in FY 27 and construction in FY 28. The focus areas for this project will be: Zellwood, Raywood, Redwood, Caliva, & Kenwood.						
Project Rationale						
To improve potable water distribution system reliability, fire flow, water quality and pressure as well as reduce the amount of flushing necessary to maintain water quality. The project is in various locations of the city. Project locations to be determined and prioritized based on results of fire flow and water quality dynamic hydraulic modeling. The community benefits from these projects since the water system supplies water to institutional/commercial/industrial developments.						
Funding Strategy						
This program project will be funded with Utilities Funds.						
Operation Budget Impact						
Addition of new pipeline to the distribution system inherently increases operation costs over time. However, improvements should also decrease operations costs by improving water quality in the system and by reducing water used for flushing dead ends.

3,000,000	0	0	500,000	2,500,000	0	0	0	
Strategic Pillar								
Infrastructure & Facilities Integrity								
Project Description								
This project is for the construction of a sludge press.								
Project Rationale								
Currently sludge from the surface water treatment process is discharged to the onsite ponds. The sludge is dried by the evaporation of the water from the pond. Once dry, the sludge is removed from the ponds and hauled to a landfill for disposal. Since the drying ponds are open to the atmosphere the sludge does not completely dry and must be removed from the pond and storage adjacent to the pond to complete the drying process. This process leads to the ponds being overcapacity and sludge is sent to the City's wastewater treatment plant where it goes through the entire treatment process. The sludge has deleterious effects on the wastewater treatment process and increases the cost of dewatering and hauling the wastewater treatment plant sludge. The sludge press will eliminate the use of ponds for drying and the necessary diversion of sludge to the wastewater treatment plant.								
Funding Strategy								
This project will be funded by Utilities funds.								
Expenditures To Date \$0								
Operation Budget Impact								
A sludge press will have electrical, chemical (polymer) and hauling costs. The current process has costs associated with the removal of the sludge from the ponds and hauling, which are already included in the budget. The cost to the wastewater process is difficult to calculate but significant additional sludge is hauled from the WWTP when the WTP is discharging sludge. The overall operating budget impact should be relatively minor. Additional chemical and power but less hauling and elimination of transfers to the WTP. Operational expenditures are anticipated to be budgeted in Fiscal Year 2029.

Project Description		
Myakkahatchee Water Treatment Plant improvements to provide treatment capability of Myakkahatchee Creek water during periods of high total dissolved solids (TDS).		
Project Rationale		
The implementation of this project will allow the plant to treat more water from the Myakkahatchee Creek during periods of high TDS. The surface water portion of the plant has very limited capability to treat for TDS. Using the combination of the surface water plant and the reverse osmosis plant would allow the system to produce water using the Creek in lieu of the much higher TDS wells.		
Funding Strategy		
This project will be funded by Utilities Funds.		
Expenditures To Date \$0		
Operation Budget Impact		
The study is not yet complete; however, the alternatives include the use of ultrafiltration membranes which will require additional power to operate. The exact scope of the additional power is difficult to ascertain at the time.
